

INTRODUCING "THE PORTABLE PRESENTATION STATION!"

# The Nomad AV

FEATURING

The smart choice for all your presentation needs, from the boardroom to the classroom. Simply wheel it in – plug and play!

<p style="text-align: center;"><b>1</b></p>	<p style="text-align: center;"><b>Mobile</b></p>	<p><b>You can bring powerful presentation tools - to more users - in more locations.</b> The Nomad Presentation Station, with its compact design, rugged construction and large, heavy-duty wheels, allows you to easily move the Nomad in and out of elevators, down hallways, through doors and across campus. The Nomad Presentation Station is a very cost-effective alternative to permanent AV installations.</p>	
<p style="text-align: center;"><b>2</b></p>	<p style="text-align: center;"><b>LCD Projector</b></p>	<p>The LCD projector is the hub of the Nomad Presentation Station. From it, you can project images from a notebook computer, internal computer, network, internet, VCR, DVD, document camera or cable TV on to a large screen or blank wall. Bright new projectors allow projected images to be viewed with the room lights on.</p>	
<p style="text-align: center;"><b>3</b></p>	<p style="text-align: center;"><b>Computer</b></p>	<p>Whether you present information from the hard drive, internet or use portable media like floppies, DVD, CDROM or Zip Disks, the powerful, built-in PC provides the ultimate in flexibility for your presentation needs. It is pre-wired to effectively interact with the other components.</p>	
<p style="text-align: center;"><b>4</b></p>	<p style="text-align: center;"><b>Flat Panel Display</b></p>	<p>A presenter should maintain eye contact with the audience as much as possible and not block the audience's view of the projection screen. The Nomad's flat panel monitor and adjustable arm allow the presenter to stand comfortably off to the side and maximize their eye contact with the audience.</p>	
<p style="text-align: center;"><b>5</b></p>	<p style="text-align: center;"><b>Wireless Keyboard</b></p>	<p><b>The Nomad Presentation Station includes a wireless keyboard that allows you to move freely about the room in full control of the computer system.</b> Since it uses radio frequency transmission, you can use it anywhere in the room (50' range)... a podium, a desk, or turn it over to a participant. A special port on the wireless keyboard even allows you to plug-in and use a traditional PS2 mouse remotely.</p>	
<p style="text-align: center;"><b>6</b></p>	<p style="text-align: center;"><b>Document Camera</b></p>	<p><b>The document camera is quickly becoming one of the most popular presentation tools.</b> The document camera allows you to display two or three-dimensional objects, documents, books, overhead transparencies, a diagram, a map, etc. The image seen by the document camera is projected on the large screen for easy viewing.</p>	
<p style="text-align: center;"><b>7</b></p>	<p style="text-align: center;"><b>White Board</b></p>	<p>The Nomad Presentation Station has a dry-erase whiteboard that flips up under the document camera. You can write information, diagrams, etc. that will be projected to a large screen. You can also capture the images on the computer... even create step-by-step instructions freehand that can be stored and played back at any time.</p>	
<p style="text-align: center;"><b>8</b></p>	<p style="text-align: center;"><b>VCR / DVD Player</b></p>	<p>A hi-fi stereo VCR / DVD Player is fully integrated to allow you to easily play VCR tapes or DVD discs. With the VCR remote control or Nomad Simplicity Pad, you have complete one-button control of the VCR actions.</p>	
<p style="text-align: center;"><b>9</b></p>	<p style="text-align: center;"><b>Speakers</b></p>	<p><b>Quality sound improves audience attention and understanding of content.</b> A Bose Multimedia Sound System is integrated to bring the sound to life. The system provides clear, quality sound that will support a room with up to 250 people. The sound system consists of an amplified bass module that fills the room with rich low tones and two cube speakers that can be easily rotated towards the audience for optimum sound reception.</p>	
<p style="text-align: center;"><b>10</b></p>	<p style="text-align: center;"><b>Input/Output Ports</b></p>	<p>There are three input/output ports located in the rear access panel of the Nomad Presentation Station. A RJ45 network connection for network and internet access, a coax connection for TV or satellite hook-up and a 1/4" stereo speaker out (line out) port for external amplification and speakers. These connections further enhance your ability to provide an effective presentation.</p>	
<p style="text-align: center;"><b>11</b></p>	<p style="text-align: center;"><b>Ease of Use</b></p>	<p>Nomad customers and prospects enthusiastically say: <i>"The Nomad Simplicity Pad is what makes the system easy to use!"</i> With the touch of a button, the Nomad Simplicity Pad lets you control the VCR functions, volume settings and input source. The custom cabling, cart design, logical layout and equipment selection further add to the ease-of-use that is the trademark of the Nomad Presentation Station.</p>
