Introduction

This supplement is an update to the 1997-99 catalog and should be used in conjunction with it. It contains updated information on the academic programs, calendar, tuition and fees and policies for the 1998-99 academic year. However, program requirements, courses, policies, tuition, fees and procedures are subject to change as circumstances and exigencies require. Additional information may be obtained from the appropriate office or the Registrar.

Accessibility for Persons with Disabilities
Middlesex County College provides reasonable accommodation for qualified individuals with disabilities. Students requesting information regarding procedures should contact the Counselor for Students with Disabilities at (732) 906-2546.

Accreditation
Middlesex County College is accredited by the Middle States Association of Colleges and Secondary Schools. Inquiries may be sent to:

Commission on Higher Education
Middle States Association of Colleges and Schools
3624 Market Street
Philadelphia, PA 19104

APPEALS

Academic Appeals
You may file a written appeal for an exception to an academic policy. You must be able to demonstrate that there are circumstances that warrant an exception. You should submit academic appeals to the academic dean of the division that administers your degree or certificate program. Your academic dean may meet with you to discuss your appeal. The decision of the dean is final. Appeal forms are available in your dean’s office and in the Office of the Registrar.

You should direct questions about a course grade to the course instructor or to the academic department chairperson of the course. All approved grade changes must be submitted to the Office of the Registrar within one year of the original grade assignment.

Financial Appeals
You may file a written appeal for an exception to tuition and fee refund policies. The Tuition appeals Committee will consider appeals in the case of serious illness or death of a family member, and requires that proper supporting documentation be submitted with the appeal. You should submit financial appeals to the Office of the Registrar for review by the committee. Appeal forms are available in the Office of the Registrar. You must submit financial appeals within 30 days of the last day of the semester related to the appeal.
Advanced Standing

Certified Professional Secretary Certificate
The College grants up to 28 credits for achievement of the Certified Professional Secretary Certificate. The Certificate is awarded by The Institute for Certifying Secretaries, G10 Crown Center, 2440 Pershing Road, Kansas City, MO 64108.

The following is a list of courses for which you will be awarded transfer credit:

- BUS 101 Business Organization & Management 3 credits
- BUS 107 Computer Applications for Business 3 credits
- BUS 115 Mathematics of Finance 3 credits
- BUS 201 Business Law I 3 credits
- ECO 201 Principles of Economics I 3 credits
- OAD 101 Document Processing I 2 credits
- OAD 102 Document Processing II 2 credits
- OAD 208 Office Admin Cooperative Work Experience 3 credits
- OAD 211 Contemporary Office Procedures 3 credits
- OAD 213 Administrative Office Management 3 credits

Academic Statuses

Academic Probation and Restriction
A student on Academic Probation or Restriction who has voluntarily not enrolled for the next semester will be placed on Academic Probation for the next semester in which she/he enrolls, with the permission of the Dean of his/her division, or of the Department Chairperson or the Academic Advising Center.

Graduation

May Commencement Ceremony
Graduates who have satisfied all degree requirements at the end of a spring semester and all graduates from the previous January and August semesters, may participate in the May commencement ceremony. Candidates must submit an application for May graduation by March 1. Additionally, candidates for degrees in Automotive Technology, the Culinary Arts Option in Hotel, Restaurant and Institutional Management, Radiography Education, Respiratory Care and candidates for the certificate in Culinary Arts who will complete all degree or certificate requirements at the end of August may participate in the ceremony. To be eligible, candidates must submit an application for August graduation by March 1.

Honors at Graduation
Graduates who have earned honors at graduation will be given a gold tassel to wear with their cap and gown. Eligible August candidates who subsequently earn honors after having completed all degree/certificate requirements will be given a gold tassel when they receive their diplomas/certificates in September.

Degrees are conferred in absentia when candidates have received permission in advance from their academic dean to be excused from the May commencement ceremony.
NEW PROGRAMS

ACCOUNTING
The Accounting Technical Certificate is designed for individuals with a college degree who have satisfied basic skills, general education and mathematics requirements.

Total Credits 19-20
**Small Business Management/Entrepreneurial Studies**  
Business Administration and Management Department

**Why major in Small Business Management/Entrepreneurial Studies?** Small Business Management/Entrepreneurial Studies is for people who intend to start, or who already operate a small business. If you have a skill, an idea, a thing you have always liked to do-and you want to be your own boss - this program can help you realize your goal of running a successful business.

**If I major in Small Business Management/Entrepreneurial Studies, what degree can I earn?** You have several choices with this major. You can earn an **Associate in Applied Science** degree, a **Certificate of Achievement** or a **Technical Certificate**. The degree program incorporates general education courses with the small business management curriculum. The Certificate of Achievement is designed for those with no prior college course work and includes English composition with the small business management curriculum. The Technical Certificate program is geared toward people who already hold a college degree and intend to operate a small business.

**If I major in Small Business Management/Entrepreneurial Studies, can I transfer to a four year college or university?** Many colleges and universities will apply the courses you have taken towards a bachelor’s degree. You should meet with an academic advisor for appropriate planning.

**What will I learn if I study Small Business Management/Entrepreneurial Studies?** You will study the elements that are necessary for a thriving business; business plan, capital needs, marketing strategies, legal and tax issues, forms of ownership, employee management, new technologies, sales, marketing and new product development. You will acquire skills particular to entrepreneurs but transferable to the general business environment.

**Are there any requirements I must satisfy before I start taking courses in my major?** You must demonstrate proficiency in keyboarding or typewriting by either completing OAD 010, Keyboarding for Computers or by appropriate waiver of the Office Administration Department Chairperson. Algebra I is a prerequisite for all majors. You may satisfy this requirement with a grade of C or better in high school Algebra I. Algebra I competency must be verified with a passing score on the College placement test.

**How long will it take for me to complete this degree?** If you do not need developmental coursework, and you register for an average of 16 credits each semester, you can complete the degree in two years. If you do not need developmental coursework, and you register for an average of 15 credits each semester, you can complete the certificate in one year. You can shorten the amount of time by taking courses in the summer and winter sessions. Some major courses in the Small Business Management program may only be offered in the evenings.

*Check course descriptions for complete list of prerequisites and corequisites.*

*Total Credits  64-68*
Course Descriptions

ACCOUNTING

Change in prerequisites
ACC 208
ACCOUNTING FIELD EXPERIENCE
3 credits (1-12)
Prerequisites: ACC 102 and written permission of the Department Chair of Cooperative Education and Internships.

ART

Change in title and course description
ART 223
SCULPTURE IN RELIEF
3 credits (3-0)
Explores the language and materials of sculpture in relief. Develops skills and understanding of the basic elements of sculptural form through the modeling, carving and casting in relief. Examines the work of sculptors through slides, films, books and field trips. A materials fee is assessed to cover the cost of materials required for the course.

BIOLOGY

BIO 228
GENETICS
4 credits (3-3)
Prerequisite: BIO 124 or departmental approval; CHM 124 or departmental approval
Mendelian and molecular concepts of heredity and their relationship to cell function, development and evolution. Topics include structure, function of genes, patterns of inheritance, nature and causes of mutations, mechanisms of gene regulation and population genetics. Lab includes genetics of fruit flies, fungi, bacteria, human pedigree analysis and modern molecular techniques.

BUSINESS

Change in title
BUS 107
COMPUTER APPLICATIONS FOR BUSINESS
3 credits (3-0)

CIVIL/CONSTRUCTION ENGINEERING TECHNOLOGY

Change in prerequisites
CIT 105
STATICS FOR TECHNICIANS
3 credits (3-0)
Prerequisites: CIT 110 or MCT 101; MAT 109

COMMUNICATION

Change in prerequisite
COM 208
COMMUNICATION SEMINAR AND FIELD EXPERIENCE
3 credits (1-12)
Prerequisite: Permission of department chair

COMPUTER SCIENCE

CSC 226
NETWARE 3 TO 4 UPDATE
3 credits (2-2)
Provides a 3.1x System Administrator with an overview of the NetWare 4 NDS (NetWare Directory Services) environment. Topics include contrasting the differences between the two systems and the integration of NetWare 3 and NDS. Covers the Novell course #526 InternetWare 3 to InternetWare 4.11 Update. Upon successful completion of the course, the student will be prepared to take the associated Novell Certification test which is required for CNE (Certified Novell Engineer) certification.

COUNSELING AND PLACEMENT SERVICES

CPS 041
STRATEGIES FOR SUCCESS
3 credit equivalent (3-0)
Prerequisite: CPS 031 or departmental approval
Second course in a two-semester sequence for students in Project Connections. Provides an opportunity for students to learn strategies for academic success and to plan for successful transitions in career and education. Focuses on a better understanding of LD issues and self-advocacy, to become familiar with the Adaptive Lab Equipment, to set career and educational goals and design strategies to accomplish them.
ENGLISH

ENG 110
INTRODUCTION TO RESEARCH WRITING
3 credits (3-0)
Prerequisites: Appropriate scores on the reading and writing portions of the College Placement Test or a grade of C or better in RDG 009 and ENG 009.
Corequisites: RDG 011 and ENG 010. Completing RDG 011 and ENG 010 with grades of C or better or passing the reading and writing portions of the College Placement Test waives the corequisite.

An introduction to the basic strategies of library research and formal research writing. Through a variety of research projects and writing assignments across the curriculum requiring use of source materials, students will write between 5,000 and 7,000 words and learn both MLA and APA formats. (Does not fulfill the requirement for freshman composition — ENG 121 and ENG 122/125, and cannot be used to fulfill Liberal Arts elective requirements.)

Change in prerequisite(s)
ENG 121
ENGLISH COMPOSITION I
3 credits (3-0)
Prerequisite(s): A passing score on the writing portion of the College Placement Test or a grade of C or better in ENG 010; completion of RDG 009 with a C or better or a score on the reading portion of the College Placement Test that exempts the student from RDG 009.

Change in prerequisite(s)
ENG 122
ENGLISH COMPOSITION II
3 credits (3-0)
Prerequisite(s): A grade of C or better in ENG 121 and a passing score on the reading portion of the College Placement Test or a grade of C or better in ENG 121.

Change in prerequisite(s)
ENG 125
ENGLISH COMPOSITION II:
WRITING ABOUT LITERATURE
3 credits (3-0)
Prerequisite(s): A grade of C or better in ENG 121 and a passing score on the reading portion of the College Placement Test or a grade of C or better in ENG 121.

ENG 131
RESEARCH, COMPOSITION AND PRESENTATION I
2 credits (2-0)
Prerequisite: A passing score on the College Placement Test or a grade of C or better in ENG 010.
Written and oral communication skills for students in the Mecomtronics Engineering Technology and Telemedia Communications Technology programs. Students read and write technical documents and prepare a variety of written and oral projects and a documented research report. Develop competence in clear, correct, effective written English. Students will write between 5,000 and 7,000 words, including drafts and revisions, present two formal oral reports and learn basic word processing skills.

ENG 132
RESEARCH, COMPOSITION AND PRESENTATION II
2 credits (2-0)
Prerequisite: A grade of C or better in ENG 131
Continuation of ENG 131. Emphasizes more complex written projects, oral reports and presentations and a documented field research report. In addition, the student develops competence in the reading and writing of technical documents, the analysis and interpretation of written material and the use of written sources as the starting point for expository writing. Students continue to develop interviewing, oral communication and presentation skills and learn how to prepare visual materials. Students will write between 5,000 and 7,000 words, including drafts and revisions, and present two formal oral reports. For Mecomtronics Engineering Technology and Telemedia Communications Technology majors.

ENG 133
RESEARCH, COMPOSITION AND PRESENTATION III
2 credits (2-0)
Prerequisite: A grade of C or better in ENG 132
Continuation of ENG 132. Emphasizes more complex written projects—augmentation and persuasion—and a documented research project that integrates oral reports and presentations. In addition, students develop additional competence in the reading and writing of technical documents, the analysis and interpretation of written material—including poetry, drama and fiction—and the use of written sources as the starting point for expository writing. Students polish interviewing, oral communication and presentation skills; prepare visual materials; participate in team writing projects and prepare a resume. Students will write between 5,000 and 7,000 words, including drafts and revisions, and present two formal oral reports. For Mecomtronics Engineering Technology and Telemedia Communications Technology majors.

ENGLISH AS A SECOND LANGUAGE

Change in course description
EST 009
ENGLISH AS A SECOND LANGUAGE TRANSITION
4 credit equivalents (3-1)
For former ESL students whose test scores show they need intensive work to improve their writing abilities. Develop the ability to write in Standard American English. Provides instruction in sentence structure, punctuation and usage, taking into consideration the needs of second language learners; students regularly practice writing effective sentences, paragraphs and short essays. This course is in place of ENG 009 and students may have to enroll in ENG 010 after successfully completing EST 009. “C” is the minimum acceptable grade for movement from one remedial/developmental level to another for completion of remediation/developmental requirements.

HEALTH

Change in prerequisite
HED 209
CHILD HEALTH AND NUTRITION
3 credits (3-0)
Prerequisite: None
HOTEL, RESTAURANT, AND INSTITUTION MANAGEMENT

Change in credit and contact hours
HRI 109
PROFESSIONAL CULINARY TECHNIQUES
3 credits (1-4)

LEGAL STUDIES

Change in prerequisite
LET 104
PROPERTY TRANSACTIONS
3 credits (3-0)
Prerequisites: LET 101 AND 113

MARKETING ART AND DESIGN

Change in contact hours
MAD 121
GRAPHICS FOR COMPUTER AUTHORS AND PRESENTERS
3 credits (2-2)

MATHEMATICS

MAT 123
INTRODUCTION TO PROBABILITY AND STATISTICS
3 credits (3-0)
The general education designation for this course was omitted from the 1997-99 catalog.

MAT 141
MATHEMATICS FOR TELECOMMUNICATIONS I
2 credits (2-0)
Prerequisite: MAT 013 or equivalent
Basic mathematics emphasizing arithmetic, basic algebraic manipulation and graphing. Topics include: Mathematical logic, number systems, significant digits, scientific notation, operations on polynomials, solving linear equations, analytic geometry, graphing linear equations, systems of equations, ratio and proportion. For Telemedia Communications Technology majors.

MAT 142
MATHEMATICS FOR TELECOMMUNICATIONS II
2 credits (2-0)
Prerequisite: MAT 141
Emphasizes algebra and trigonometry, also introducing statistics. Topics include: essentials of right angle trigonometry, graphs of sine and cosine, basic trigonometric identities, factoring, algebraic fractions, fractional equations, quadratic equations, introduction to statistical ideas, types of data and graphical presentations of non-quantitative data. For Telemedia Communications Technology majors.

MAT 145
INTEGRATED MATHEMATICS I
2 credits (2-0)
Prerequisite: MAT 014 or two years of high school algebra and appropriate score on the College Placement Test.
A collaborative learning, project-oriented course for technical students. This is the first semester of a four-semester sequence that culminates with topics in calculus. Its purpose is to make students aware of the mathematical concepts needed to compete in the twenty-first century. Students will apply problem-solving techniques using real world situations from their technical and science courses. Topics include functions, number sense, number bases, use of the graphing calculator, basic trigonometry, polynomial equations, elementary statistics, logic, analytical geometry, transforming real world situations into mathematical models, properties of basic geometric figures, ratio and proportion, scientific notation and conversion of units.

MAT 146
INTEGRATED MATHEMATICS II
2 credits (2-0)
Prerequisite: MAT 145
The second semester of a four-semester sequence that culminates with topics in calculus. Topics from the previous semester will be reinforced and expanded upon. Topics include functions, number sense, use of the graphing calculator, trigonometry, polynomial, rational and radical equations, elementary statistics, analytical geometry, transforming real world situations into mathematical models, properties of geometric figures, ratio and proportion.

MAT 241
MATHEMATICS FOR TELECOMMUNICATIONS III
2 credits (2-0)
Prerequisite: MAT 142
Probability and descriptive statistics. Topics include: graphical presentations of quantitative data, measures of central tendency, measures of dispersion, elementary probability theory, random variables, probability distributions, binomial distribution, Poisson distribution and normal distribution. For Telemedia Communications Technology majors.

MAT 242
MATHEMATICS FOR TELECOMMUNICATIONS IV
2 credits (2-0)
Prerequisite: MAT 241
Algebra and discrete math. Topics include: fractional exponents, radicals, logarithmic functions, logarithmic and exponential equations, graphs, Euler circuits, Hamiltonian cycles, trees, minimal spanning trees, shortest route problems and scheduling problems. For Telemedia Communications Technology majors.

MAT 245
INTEGRATED MATHEMATICS III
2 credits (2-0)
Prerequisite: MAT 146
The third semester of a four-semester sequence that culminates in topics in calculus. Topics from the previous semester will be reinforced and expanded upon. Topics include polynomial functions, rational functions, radical functions, trigonometry, exponential functions, logarithmic functions, probability and statistics and conic sections.

MAT 246
INTEGRATED MATHEMATICS IV
2 credits (2-0)
Prerequisite: MAT 245
The final semester of a four-semester sequence that introduces topics in calculus. Topics include limits, the derivative, the definite integral and integration. Calculus topics will be based on technical applications and computer software will be utilized to solve problems.
MCT 102
SUPPORT AND MAINTENANCE OF COMPUTER SYSTEMS
2 credits (1-2)
Prerequisites: MCT 101 and 103
Corequisites: MCT 104 AND 106; PHY 146; MAT 146, and ENG 132
Learn how to support, maintain, upgrade and troubleshoot the hardware and software of personal computers. Learn about software licensing requirements, and install and upgrade applications and operating system software; use the Internet and manufacturer’s computer bulletin boards to download software updates and technical specifications; install and replace internal computer devices such as drives, cards and memory and learn about compatibility between hardware devices. Students troubleshoot hardware and software malfunctions. For Mecomtronics Engineering Technology majors.

MCT 103
FOUNDATIONS OF MECOMTRONICS
4 credits (3-3)
Corequisites: MCT 101, PHY 145, MAT 145, and ENG 131
A project-oriented course that provides a foundation for technical studies within the Mecomtronics program. Topics in Computer Aided Drafting cover mechanical, electrical and assembly drawings. Electrical and mechanical principles are introduced through various product development activities. Product characteristics and specifications are explored through the use of measuring instruments, manufacturers’ data and study of properties of materials.

MCT 104
ELECTRICAL AND MECHANICAL POWER SYSTEMS
4 credits (3-3)
Prerequisite(s): MCT 101 and MCT 103
Corequisite(s): MCT 102, MCT 106, MAT 146, PHY 146, and ENG 132
A study of electrical and mechanical power components and systems used in the transmission of mechanical power and the distribution of electrical power. Topics include analysis of electric circuits; electromagnetic devices and their use in systems; discrete semiconductor switching devices; hydraulic and pneumatic power devices; types and uses of electric motors and generators as well as power distribution systems. Troubleshooting and repair of hydraulic, pneumatic control equipment and electrical/electronic systems will be studied through a number of industry-based projects.

MCT 106
AUTOMATED SYSTEMS
4 credits (3-3)
Prerequisite(s): MCT 101 and MCT 103
Corequisite(s): MCT 102, MCT 104, MAT 146, PHY 146, and ENG 132
A study of theory, performance and applications of automated systems presented through a number of industry-based projects. Topics include open and closed loop control systems and their electrical and mechanical control components, electronic controllers, numerical control and robotics equipment, PLC controlled operation and material handling systems.

MCT 201
TELECOMMUNICATIONS WITH INDUSTRIAL APPLICATIONS
3 credits (2-3)
Prerequisite(s): MCT 102, MCT 104, and MCT 106
Corequisite(s): MCT 203, MCT 205, ENG 133, MAT 245 and PHY 245
Provides a background in the theory of telecommunications and hands-on experience installing and administering a network. Learn technical characteristics of telecommunications, such as protocols, transmission characteristics, data representation, carrier techniques and multiplexing. Evaluate and select network components, install network hardware, software and cabling, troubleshoot network malfunctions and perform network administration tasks. For Mecomtronics Engineering Technology majors.

MCT 202
SPECIAL TOPICS IN ENGINEERING TECHNOLOGY
3 credits (3-0)
Prerequisite(s): MCT 201, MCT 203, and MCT 205
Corequisite(s): MAT 246 and PHY 246
An introduction to current topics in computer and engineering technology. Topics are one or more of the following areas: Microelectronics and Semiconductor Manufacturing, Electrical Power Generation and Distribution, Electronic Communications, Computer Engineering, Biomedical Equipment, Instrumentation and Transportation Technology.

MCT 203
CONTROL AND AUTOMATION OF MANUFACTURING SYSTEMS
3 credits (2-3)
Prerequisite(s): MCT 104, MCT 106
Corequisite(s): ENG 133, MAT 245, MCT 201, MCT 205 and PHY 245
A study of the theory, performance and application of Automated Manufacturing Systems, Programmable Logic Controls (PLC), Manufacturing Work Cells, Transportation of Materials during the Manufacturing Process and Automated Inspection Techniques. Topics include components and operation of hydraulic, pneumatic, electric drives and automated inspection techniques and their control. Industry-based projects are used to set-up, operate, analyze and control various automated manufacturing systems.

MCT 205
MANUFACTURING PROCESSES AND QUALITY MANAGEMENT
4 credits (3-3)
Prerequisite: MCT 106
Corequisite(s): MCT 203, ENG 133, MAT 245 and PHY 245
A study of the theory, performance and application of manufacturing processes, prototyping and assembly along with methods of statistical process control. Topics include Product Realization, Computer Aided Manufacturing, Prototyping and Principles of Electronic Product Manufacturing and Assembling, Reliability and Quality Decisions Based on Cost. Industry-based projects are used to manufacture and produce quality products using ISO 9000 quality standards.
MCT 206
CAPSTONE PROJECT
3 credits (2-3)
Prerequisite(s): MCT 201, MCT 203 and MCT 205
Corequisite(s): MAT 246, PHY 246
A culmination of studies through a comprehensive project which validates knowledge and skills acquired through Meacomtronics Engineering Technology program. Students will design, develop and produce a product or a process using methods and techniques consistent with industrial practices requiring a formal written report and oral presentation.

MCT 208
MECOMTRONICS AND TELEMEDIA TECHNOLOGY FIELD EXPERIENCE
3 credits (1-12)
Prerequisites: Meacomtronics Technology Field Experience — MCT 102, MCT 104, and MCT 106; Telemedia Technology Field Experience — TCT 104 and TCT 122
A cooperative work experience program employing students in a Meacomtronics or a Telemedia position in order to gain practical experience necessary for success in these technical fields. Supervision of the departmentally approved position is provided by the College through on-the-job visits and individual progress review sessions. Students are required to establish learning objectives related to their positions in order to effect the attainment of specific job competencies. Students attend a weekly, one-hour seminar on Campus and work a minimum of 180 hours a semester.

MECHANICAL ENGINEERING TECHNOLOGY

Change in prerequisites
MEC 112
MANUFACTURING PROCESSES AND MATERIALS II
4 credits (3-3)
Prerequisites: MCT 101 and MEC 111

Change in prerequisites
MEC 219
DYNAMICS OF MACHINE ELEMENTS
3 credits (2-3)
Prerequisites: MAT 110, MCT 101, MEC 123, PHY 115, SPE 121

MEDICAL LABORATORY TECHNOLOGY

Change in prerequisite
MED 212
MEDICAL TECHNOLOGY III
8 credits (4-16)
Prerequisite: BIO 211

PHYSICAL EDUCATION

PED 120M
GOLF FOR PHYSICAL EDUCATION MAJORS
1 credit (0-2)
Includes organizational skills, learning principles and the correct mechanics of a golf swing. Students will be required to develop lesson and block plans, and required to teach. For Physical Education majors.

PED 127M
TENNIS FOR PHYSICAL EDUCATION MAJORS
1 credit (0-2)
Includes organizational skills, learning principles and the correct mechanics of tennis skills. Students will be required to develop lesson and block plans, and be required to teach. For Physical education majors.

PED 143M
SWIMMING FOR PHYSICAL EDUCATION MAJORS
1 credit (0-2)
Includes organizational skills, learning principles and development of swimming skills. Students will be required to develop lesson and block plans, and be required to teach. For Physical Education majors.

Change in course title
PED 210
SCIENTIFIC PRINCIPLES OF FITNESS
3 credits (3-0)

PED 225
FIRST AID, CPR AND SAFETY EDUCATION
3 credits (3-0)
The theory and practice of basic life saving skills and accident prevention. Topics covered include basic first aid skills, rescue breathing and cardiopulmonary resuscitation (CPR). The ability to recognize serious medical emergencies and the recommended course of action are the basic elements of this course. National Safety Council certification will be given to qualified students.

PHYSICS

PHY 141
FOUNDATIONS OF PHYSICS I
2 credits (1-2)
Corequisite: MAT 141
Algebra-based physics. Topics include units, kinematics, dynamics, work and energy, geometric optics and optical instruments.

PHY 142
FOUNDATIONS OF PHYSICS II
2 credits (1-2)
Prerequisite: PHY 141
Corequisite: MAT 142
A continuation of PHY 141. Topics include harmonic motion, wave motion, sound, electrostatics and direct current circuits.

PHY 145
MECOMTRONICS PHYSICS I
2 credits (1-2)
Corequisites: MAT 145, MCT 101, MCT 103, and ENG 131
An activity-based physics course emphasizing the development of problem-solving and laboratory skills. Provides a concurrent presentation of the core scientific knowledge needed to support the technological courses in
engineering technology curricula. Topics include kinematics, dynamics, conservation of energy and momentum, fluids, thermodynamics, properties of materials, electrostatics and electric circuits. The first semester of a four-semester algebra and trigonometry-based physics sequence in which topics will be revisited and explored in increasing depth. For technology students.

**PHY 146**
**MECOMTRONICS PHYSICS II**
2 credits (1-2)
Prerequisites: PHY 145, MCT 102, MCT 104, MCT 106, and ENG 132
Corequisites: MAT 146

An activity-based physics course emphasizing the development of problem-solving and laboratory skills. Provides a concurrent presentation of the core scientific knowledge needed to support the technological courses in engineering technology curricula. Topics include kinematics, dynamics, conservation of energy and momentum, fluids, simple and damped harmonic motion, fluids, thermodynamics, properties of materials, electrostatics, electric circuits, magnetism and optics. The second semester of a four-semester algebra and trigonometry-based physics sequence in which topics will be revisited and explored in increasing depth. For technology students.

**PHY 146**
**MECOMTRONICS PHYSICS III**
2 credits (1-2)
Prerequisites: PHY 146, MCT 201, MCT 203, MCT 205, and ENG 133
Corequisites: MAT 245

An activity-based physics course emphasizing the development of problem-solving and laboratory skills. Provides a concurrent presentation of the core scientific knowledge needed to support the technological courses in engineering technology curricula. Topics include kinematics, dynamics, conservation of energy and momentum, simple and damped harmonic motion, fluids, thermodynamics, properties of materials, electrostatics and electric circuits, magnetism and optics, atomic structure and quantization. The third semester of a four-semester algebra and trigonometry-based physics sequence in which topics will be revisited and explored in increasing depth.

**PHY 246**
**MECOMTRONICS PHYSICS IV**
2 credits (1-2)
Prerequisite: PHY 245
Corequisites: MAT 246, MCT 206, and MCT 202

An activity-based physics course emphasizing the development of problem-solving and laboratory skills. This course will provide a concurrent presentation of the core scientific knowledge needed to support the technological courses in engineering technology curricula. Topics include kinematics, dynamics, conservation of energy, thermodynamics and optics, atomic and molecular physics. The fourth semester of a four-semester algebra and trigonometry-based physics sequence in which topics will be revisited and explored in increasing depth.

**PSYCHOLOGY**

The course prerequisite was omitted from the 1997-99 catalog.

**PSY 219**
**THEORIES OF PERSONALITY**
3 credits (3-0)
Prerequisite: PSY 123

**RESPIRATORY CARE**

The following course numbers have been changed:

Old number: RST 105 PRINCIPLES OF VENTILATORY SUPPORT
New number: RST 208
Old number: RST 106 CLINICAL PRACTICE II
New number: RST 209
Old number: RST 108 CLINICAL PRACTICE III
New number: RST 209
Old number: RST 204 CARDIOPULMONARY PHARMACOLOGY
New number: RST 207

Change in course number, title and credits:

Old:
RST 205 ADVANCED CONCEPTS IN RESPIRATORY CARE
3 credits
New:
RST 211 PEDIATRIC/NEONATAL RESPIRATORY CARE
2 credits

**RST 210**
**CARDIOPULMONARY EVALUATION**
2 credits (2-2)

Invasive and non-invasive diagnostic and monitoring procedures including roentgentography, electrocardiography, pulmonary function testing, hemodynamic monitoring, arterial blood gas analysis, patient interviewing and physical assessment.
RST 212
LONG-TERM, HOME AND REHABILITATIVE CARE
2 credits (2-2)
Analysis of the goals and methods underlying the provision of respiratory care in non-acute settings. Includes standards and regulations governing non-acute respiratory care, team planning, patient selection, program design and provision and documentation of various clinical services in the home and in long-term care and rehabilitation facilities. Includes cost, reimbursement and ethical issues.

SMALL BUSINESS MANAGEMENT

SBM 110
ACCOUNTING FOR SMALL BUSINESS
4 credits (4-0)
Focuses on accounting as applied in the small business setting. Emphasizes small business record keeping from basic journalizing to year-end closing and financial statement preparation. Use of computerized general ledger and other software will be employed to accomplish the above mentioned tasks. Also covers managerial issues and demonstrates use of basic analytical tools for problem solving at the small business level.

SBM 120
SMALL BUSINESS MANAGEMENT
3 credits (3-0)
Introduces the student to the principles of small business management and the functions of planning, organizing, directing, controlling, financing and staffing a small business enterprise.

SBM 130
MARKETING AND SALES FOR SMALL BUSINESS
3 credits (3-0)
For the small business owners/entrepreneurs looking to improve their marketing skills in today’s domestic, global and international business environments. Through a case study format with additional emphasis on other relevant functional areas of business, the student will come to fully understand all activities and processes involved in the flow of goods, services, ideas and events from producer and/or manufacturer to consumers. Through this type of analysis the small business owner/entrepreneur will be able to incorporate a systems approach, to fully understand the marketing and sales conditions being affected and to analyze the problems as well as the strategies used in solving these problems.

SBM 210
ADVERTISING AND PROMOTION
FOR SMALL BUSINESS
3 credits (3-0)
Techniques of advertising and sales promotion to increase sales. Topics include: policies and procedures used in planning and preparing advertisements, evaluation and selection of media, planning and coordinating advertising, sales promotion and facility layout for small business.

SBM 220
LEADERSHIP AND SUPERVISION
3 credits (3-0)
Learn about leadership and supervision in modern organizations. Introduces a variety of behavioral and managerial leadership theories and research findings such as the Ohio Studies, participative leadership. Case studies, experimental exercises and the media are used to stimulate classroom discussion.

SBM 230
RISK AND FINANCIAL MANAGEMENT
3 credits (3-0)
Introduces the fundamental principles of risk and financial management. Content focuses on insurance, consumer and trade credit, budgeting, banking, investing, loans and other financial considerations facing owners of small business.

SBM 240
COOPERATIVE EDUCATION/INTERNSHIP IN SMALL BUSINESS
3 credits (1-12)
Prerequisite: Senior status in Small Business Management curriculum or written permission of department chair. Integration of classroom study with specific planned periods of learning through work experience, Co-op or internship-based. The course utilizes a seminar approach with performance-based human relations activities and individual student objectives that are job-related and employer-evaluated.

SBM 250
SEMINAR IN ENTREPRENEURIAL STUDIES
3 credits (3-0)
Prerequisites: BUS 101, SBM 110, SBM 120, SBM 130, SBM 210 or permission of department chairperson.
Corequisites: SBM 230
Enhances the working knowledge required to manage a small business, considering both domestic and global implications. Learn the differences between business ownership and entrepreneurship. Emphasizes the real-world financing of entrepreneurship, mergers and acquisitions as they apply to current business practices. Students will go beyond the rudiments of “discovering a good business concept” to analyzing and developing a comprehensive plan to test the profitability potential of the venture. Using the business plan approach, students will conduct the research and investigation required to determine the viability of starting, buying or selling an existing business. Case studies will include in-depth financial analyses of successful business.

TELEMEDIA

TCT 103
PRODUCT MAINTENANCE I (DIGITAL)
4 credits (3-3)
Corequisites: MCT 101, MAT 141, PHY 141, and ENG 131
Introduces a variety of digital circuits and how these circuits relate to computers and telecommunications. Topics include boolean algebra, karnaugh mapping, combinatorial and sequential circuits, decoders, multiplexers, registers and counters, UARTS and modems. An introduction to RS232 and other serial interfaces is given. Subjects specific to computers are covered and include the boot process, drivers, busses, interrupts, sound and video boards and an overview of windows, DOS and diagnostic programs. Extensive use of computer simulation software is an integral component of the course. Students are expected to complete individual as well as team projects.
TCT 104
PRODUCT MAINTENANCE II (ANALOG)
4 credits (3-3)
Prerequisites: TCT 103 and MCT 101
Corequisites: MAT 142, PHY 142 and ENG 132
An introduction to the basic understanding of electronic circuits and electronics. Includes AC/DC circuits, semiconductor devices, integrated mixed analog and digital circuits and active filters. Introduces communication topics such as modulation, multiplexing techniques and transmission mediums. Extensive use of computer simulation software is an integral component of the course. Students are expected to complete individual as well as team projects.

TCT 122
MULTIMEDIA PRESENTATIONS
3 credits (2-3)
Prerequisites: MAD 121
Corequisites: ENG 132
Discusses the use of multimedia technology and its inclusion in the production of marketing presentations. Hardware components needed to create a multimedia environment, with special consideration given to the MPC Specifications standards, are utilized in the creation of team projects. Hardware studied includes video cameras, digital cameras, video capture boards, microphones, monitors, speakers, audio and graphics boards, hard drives and related connectors and processors and CD-ROM drives. Environmental requirements for the design of model multimedia products are examined. This course is project-based and will culminate in the development of a multimedia marketing presentation by the students. These computer-based presentations will demonstrate the assimilation of the multimedia building blocks of text, graphics, video and sound into a multimedia production. Both the World Wide Web and interactive learning tools are utilized.

TCT 201
PC AND LAN HARDWARE
4 credits (3-3)
Prerequisite: TCT 104
Corequisites: MAT 241 and PHY 241
Focuses on the hardware aspects of networking. Learn to upgrade, repair and troubleshoot workstation hardware through a series of hands-on objective coordinated projects. Learn the basics of networking and how to connect a workstation to a network. Concentrates on the hardware components and configurations of the personal computer. Topics include modems, their usage and set-up. Local area networking will expose the student to a variety of communication media as well as setting up print services.

TCT 202
REMOTE ACCESS AND DATA ACQUISITION
4 credits (3-3)
Prerequisites: TCT 201 and TCT 221
Corequisites: MAT 242 and PHY 242
Explores methods used to gain access to a network or network entity along with techniques of data acquisition and analysis. A studio-oriented approach to explore key topics in data acquisition and remote access. Students use state-of-the-art software products such as LabVIEW and HP OpenView to complete the objectives of this course.

TCT 221
WIDE-AREA NETWORKING I
4 credits (3-3)
Prerequisites: TCT 104 and TCT 122
Corequisites: MAT 241 and PHY 241
Introduces the fundamental concepts of data communications for wide-area networks. Video and teleconferencing are the applications through which the students develop an understanding of modern telecommunication concepts and necessary hardware. Network simulation is used by the students in the development of these concepts. Network access, types of service and protocols are covered. An understanding of the Public Switched Telephone Network and internets is developed.

TCT 222
WIDE-AREA NETWORKING II
4 credits (3-3)
Prerequisites: TCT 221 and TCT 201
Corequisites: MAT 242 and PHY 242
A hands-on hardware centered course continues the development of networking concepts begun in Wide-Area Networking I (TCT 221). Configure and troubleshoot TCP/IP networks and develop an understanding of network routing. Configure Cisco routers and establish a Videoconference over wide-area networks. Simulation of routered networks and protocol analyzers will be used to troubleshoot TCP/IP networks.
